Non-GAAP Financial Measures

Supplemental Disclosure Regarding Non-GAAP Financial Measures

CrossAmerica uses non-GAAP financial measures EBITDA, Adjusted EBITDA, Distributable Cash Flow and Distribution Coverage Ratio. EBITDA represents net income available to CrossAmerica limited partners before deducting interest expense, income taxes and depreciation, amortization and accretion. Adjusted EBITDA represents EBITDA as further adjusted to exclude equity funded expenses related to incentive compensation and the Amended Omnibus Agreement, gains or losses on sales of assets, certain discrete acquisition related costs, such as legal and other professional fees and severance expenses associated with recently acquired companies, and certain other discrete non-cash items arising from purchase accounting. Distributable Cash Flow represents Adjusted EBITDA less cash interest expense, sustaining capital expenditures and current income tax expense. Distribution Coverage Ratio is computed by dividing Distributable Cash Flow by the weighted average diluted common and subordinated units and then dividing that result by the distributions paid per limited partner unit.

EBITDA, Adjusted EBITDA, Distributable Cash Flow and Distribution Coverage Ratio are used as supplemental financial measures by management and by external users of CrossAmerica's financial statements, such as investors and lenders. EBITDA and Adjusted EBITDA are used to assess the Partnership's financial performance without regard to financing methods, capital structure or income taxes and the ability to incur and service debt and to fund capital expenditures. In addition, Adjusted EBITDA is used to assess the operating performance of CrossAmerica's business on a consistent basis by excluding the impact of items which do not result directly from the wholesale distribution of motor fuel, the leasing of real property, or the day to day operations of the Partnership's retail convenience store activities. EBITDA, Adjusted EBITDA, Distributable Cash Flow and Distribution Coverage Ratio are also used to assess the ability to generate cash sufficient to make distributions to CrossAmerica's unit-holders.

The Partnership believes the presentation of EBITDA, Adjusted EBITDA, Distributable Cash Flow and Distribution Coverage Ratio provides useful information to investors in assessing the financial condition and results of operations. EBITDA, Adjusted EBITDA, Distributable Cash Flow and Distribution Coverage Ratio should not be considered alternatives to net income or any other measure of financial performance or liquidity presented in accordance with U.S. GAAP. EBITDA, Adjusted EBITDA, Distributable Cash Flow and Distribution Coverage Ratio have important limitations as analytical tools because they exclude some but not all items that affect net income. Additionally, because EBITDA, Adjusted EBITDA, Distributable Cash Flow and Distribution Coverage Ratio may be defined differently by other companies in CrossAmerica's industry, the Partnership's definitions may not be comparable to similarly titled measures of other companies, thereby diminishing their utility.

(a) As approved by the independent conflicts committee of the Board and the executive committee of CST and its board of directors, the Partnership and CST mutually agreed to settle certain amounts due under the terms of the Amended Omnibus Agreement in limited partnership units of the Partnership.

(b) Relates to certain discrete acquisition related costs, such as legal and other professional fees, severance expenses and purchase accounting adjustments associated with recently acquired businesses.

(c) Under the First Amended and Restated Partnership Agreement of CrossAmerica, as amended, sustaining capital expenditures are capital expenditures made to maintain our long-term operating income or operating capacity. Examples of sustaining capital expenditures are those made to maintain existing contract volumes, including payments to renew existing distribution contracts, or to maintain our sites in conditions suitable to lease, such as parking lot or roof replacement/renovation, or to replace equipment required to operate the existing business.

(d) On January 26, 2017, the Board approved a quarterly distribution of \$0.6125 per unit attributable to the fourth quarter of 2016. The distribution is payable on February 13, 2017 to all unitholders of record on February 6, 2017.

(e) The distribution coverage ratio is computed by dividing Distributable Cash Flow by the weighted average diluted common and subordinated units and then dividing that result by the distributions paid per limited partner unit.

(f) Amount includes approximately 6,000 diluted units that are not included in the calculation of diluted earnings per unit on the face of the income statement because to do so would be anti-dilutive.
